# Figma / **Accessibility Plugins**

We've created a (still growing, work-in-progress) set of Figma plugins to help accelerate the accessibility annotation / checking process in the designs you're creating. As of right now, we've built:
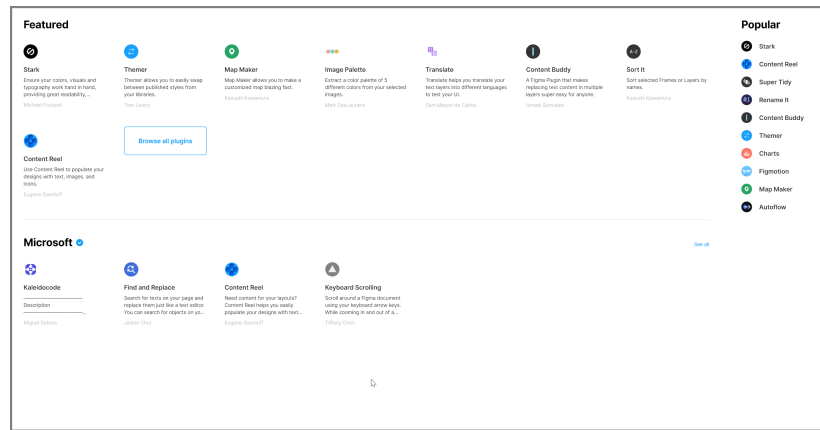

1) Color contrast checker
   (will be released soon! In the meantime, check out Stark)
2) Tab / focus order annotator
   https://aka.ms/AA5r3f4

INSTALL NOW

1. On the Figma homepage, select the Plugins tab.

2. Under the Microsoft plugin library, select the plugin you want to install. This will take you to that plugin's page.

3. Click the Install button in the top right corner.

4. In any project file menu, select the plugins you want to use.
